

Conor Murnane

Software Engineer

✉ conormurnane11@gmail.com ☎ 914-202-5209 📍 Westchester, NY 🔄 [cmur11](#)  [conor-murnane](#)

SKILLS

Languages: Ruby • JavaScript • Python • HTML • CSS

Libraries: React Hooks

Frameworks: Ruby on Rails • Bootstrap • Semantic UI

Technologies: Heroku • Netlify • Git • PostgreSQL • SQL

PROJECTS

Discourse (React, Rails, PostgreSQL, Semantic UI React, CSS)

Built with 5 team members for the Nurture Differences Hackathon, Discourse is an anonymous messaging platform aimed to bridge partisan gaps by connecting users with shared interest

🌐 [Website](#)  GITHUB [Front-end](#) / [Back-end](#)

- Project recognized by Stream Chat in [15 Stream Maker Account Projects We Love](#)
- Voted as a [top project of the week](#) on Career Karma
- Designed algorithm for matching users
- Integrated Stream Chats API with token authorization, for secure, real-time chat messaging that allows a user to edit, delete, and react to messages
- Created custom backend using Ruby on Rails to efficiently store user information
- Utilized agile practices to maximize collaboration and ensure completion of MVP deliverables

Tenant Truths (React, Rails, PostgreSQL, Semantic UI React, CSS)

A react/rails application inspired by StreetEasy and Yelp. This application allows users to review, rate, and upload photos

🌐 [Website](#)  GITHUB [Front-end](#) / [Back-end](#) | [Demo](#)

- Scraped Realtor.com API to seed real apartment listings into database
- Built image upload capability with JavaScript's FileReader
- Used EmailJS to generate emails to listing brokers
- Deployed Ruby Back-end on Heroku
- Deployed React Front-end on Netlify

Clothzilla (React, Rails, PostgreSQL, Stripe, Semantic UI React, CSS)

A react/rails ecommerce application

 GITHUB [Front-end](#) / [Back-end](#)

- Integrated STRIPE payment processing to manage credit card transactions and track customer billing
- Created filter functionality with React Hooks to allow user to filter based on product type

Personal Website (React, Bootstrap)

Portfolio website that demonstrates my professional background

🌐 [Website](#)  GITHUB [Front-end](#)

- Utilized React Scroll library for seamless transitions on web page
- Implemented React Typed and React Particles libraries for website styling
- Managed Mobile friendly development with max-width and max-height styling
- Deployed application on Google Domain

EXPERIENCE

Hazeltree

Onboarding Project Manager

Spring 2018 – Summer 2020

New York, NY

- Regularly interact with our product and development team to facilitate client driven product enhancements
- Provided weekly status updates containing outstanding items, owners of items, and expected date of completion to ensure client transparency
- Provided training on Hazeltree products to clients both on-site and over WebEx
- Tested product functionality to validate product enhancements and ensure no regression occurred

Oppenheimer Asset Management

Director, Overlay Portfolio Management

Spring 2016 – Spring 2018

New York, NY

- Part of a four-person team tasked with providing model driven performance for roughly 15,000 accounts and over \$6 billion dollars in assets under management
- Part of team that led in-house implementation of Vestmark, a portfolio management system now used by all financial advisors at Oppenheimer
